

Semester's project evaluation grid v1.3 - P2027 MDE

Semester's project name : RenovTaCana(Eau d'Azur) Client : Félix BILLAUD/Hugo LAVEZAC Technical expert : Xavier CAZALOT AGILE Coach : Olivier DESTRADE Program manager : Robert RAPADAMNABA			Absolutely Somehow Not really Not at all Not Applicable	Improving Stable Deteriorating	Outstanding Solid Basic Needs Work Resit Not Evaluable
Skill	Criteria	Who	State (MIDTERM)	State (FINAL)	Tendency
Report on your work in a professional, concise, organized and accessible manner	OR1 - Well-posed context and clearly-defined problematic	Program Manager	Somehow		
	OR2 - Well-organized reasoning and clearly-stated, coherent arguments	Program Manager	Somehow		
	OR3 - Summary moments to highlight important information and open questions.	Program Manager	Not really		
	OR4 - Story told with a coherent thread from start to finish	Program Manager	Not really		
	OR5 - The presentation correspond to the objectives of the meeting . Mid-term: retrospective of the first half of the project (management and a bit technical), planification/corrective actions and success rate prevision. Final : retrospective of the project (technical and a bit management), actual success rate, hand-over and perspective.	Program Manager	Not really		
	AR1 - Pedagogical support provided to help non-experts understand the issues.	Program Manager	Somehow		
	AR2 - Easy-to-understand (but still technically solid) presentation for all audiences : appropriate level of language, avoiding or clarifying acronyms and jargon, etc.	Program Manager	Somehow		
	AR3 - Professional presentation medium (that contributes to the discourse , with an adapted layout , taking into account legibility , respecting presentation standards)	Program Manager	Somehow		
	CR1 - Keeping to the time limit , balanced distribution of time between the different parts of the presentation.	Program Manager	Absolutely		
	PR1 - Professional attitude (look, posture) during the presentation, the questions, all the session...	Program Manager	Somehow		
	PR2 - Interesting and dynamic speech by taking in account the speaking rhythm and body language (gaze, gestures), the group speaking turn and fluidity of speech that comes from a well-prepared presentation .	Program Manager	Absolutely

			Jules reaction ← (FINAL)		
Establish a transparent and efficient collaboration with the client and project stakeholders	PM1 - A shared product vision was co-constructed by stakeholders and the project team (ex: student-initiated collaboration, appropriation of the subject, onboarding of the students by the <u>stakeholders/client</u>)	Client	Somehow		
	OG1 - The team has implemented an adaptive project management with short delivery cycle and was proactive (propose short delivery cycle of demos, ask stakeholders feedback on their work, etc.)	Client	Not really		
	OG2 - The team was proactive and has provoked meetings to agree on next priorities and next <u>iteration goal (ex: planning meeting)</u>	Client	Absolutely		
	OG3 - The team has setup transparency elements (ex: product backlog, kanban, burnup chart...) on their work to give its tutors a permanent visual information on it.	Client	Not really		
	OG4 - The team has shown its ability to anticipate and adapt to unforeseen events	Client	Not Applicable		
	CO1 - Meetings with the client and other stakeholders were well structured, lively and productive	Client	Not really		
	CO2 - The attitude of the students is perceived as what is expected from a future engineer : - Have they been a source of proposals on the functional and technical aspects? - Did they show openness, listening and initiative ? - Did they show creativity in their proposals ?	Client	Not really		
Skill evaluation		Jury			
			Absence de suivi Découverte du travail aujourd'hui Pas de Github Si il y a des imprévus auquel s'adapter ce sera difficile car le travail a été produit après le dernier sprint Pas structurée, pas tous là ← (FINAL)		
Manage team work and continuous improvement	PL1 - The team has planned his work to be done during an iteration (over the AGILE cycle or the whole semester, depending on the company's project mode) ex: iteration goal, backlog items, <u>decomposition of work in technical tasks</u> .	Project tutor	Somehow		
	PL2 - The team has shared an interactive kanban board to communicate in real time with the client/coach/expert/stakeholders on the tasks to do, doing, done	Project tutor	Absolutely		
	PL3 The team members have self managed the affectation of their tasks	Project tutor	Absolutely		
	MG1 The team is proactive and provoke short meeting regularly to synchronize their work during the <u>iteration (ex: 15' daily meeting...)</u>	Project tutor	Somehow		
	MG2 The has shown self-reflection on its values and motivation (ex: team values meeting, team mood board,...)	Project tutor	Not at all		
	CI1 - The team is proactive and propose reflexions on how to improve their practices. (ex: retrospective meetings)	Project tutor	Not at all		
Skill evaluation		Jury			
			15' chaque jour pour mettre à jour le kanban et identifier les blocages Non abordé Non abordé ← (FINAL)		
Deliver a product or a service that brings value to the client	HO1 - The team has anticipated to take into account the company's ecosystem (technical and human) in the design of his work	Client	Absolutely		
	HO2 - (Intermediary) results were handed-over to the stakeholders to allow them to test the product/service in their ecosystem (technical and human)	Client	Not really		
	HO3 - (Intermediary) results were demonstrated to the end users (In their language) .	Client	Not at all		
	U1 - The work provided by the team is usable (see already used) by the stakeholders.	Client	Not at all		
	U2 - The work provided by the team solves a problem the stakeholders had at the start of the project	Client	Somehow		
Skill evaluation		Jury			
			← (FINAL)		
Deliver a product or a service of quality (Efficient, Maintainable, Positive global impact)	Q1 - The team has questioned and specified the quality requirements of the product/service their project require. (ex: <i>What are the requirements in term of performance, security and maintainability?</i>)	Eng. Manager	Somehow		Improving
	Q2 - The team has initiated a reflection on a test procedure/policy in accordance with the Q1 quality requirements. (ex: <i>How do they know the requirements are achieved?</i>)	Eng. Manager	Somehow		Improving
	Q3 - The team has actually done the tests of the product/service in accordance with the Q2 specifications. (ex: <i>proof of manual tests, automatic tests, CI/CD</i>)	Eng. Manager	Somehow		Improving
	D1 - The team work is visibly documented , well packaged, easily maintainable, easily improved (ex: <i>architecture of the system was described ? user manual ? handover (technical) report ? Installation manual ? Readme.md generalized</i>)	Eng. Manager	Somehow		Improving
	R1 - The team has written a responsibility report of the project (Law, Ethic, Environnemental Impact) (<u>EPF deliverable</u>) <i>If applicable (project with code):</i>	Eng. Manager	Not Applicable		
	CP1 - The team members were proactive and tried to set up good coding practices with their pairs (pair programming, code review, unit tests, etc.)	Eng. Manager	Somehow		Improving
	CP2 - The team was proactive and has used a collaborative versionning tool (ex: git) (internal to the project or shared with the client) to keep track of the evolution of their work .	Eng. Manager	Somehow		Improving
Skill evaluation		Jury			
			← (FINAL)		
Be a major asset in a team	A1 - The student has shown a spirit of Initiative : they proposes ideas/solutions, reaching out for dispirited or non-responding students .	Peer-evaluation			
	A2 - The student has shown team spirit : they helps others, strenghten group bonds and making the team grow.	Peer-evaluation			
	A3 - The student has shown openness : they takes others into account and are open to novelty, diversity and unpredictability .	Peer-evaluation			
	A4 - The student has shown a strong work force : they contributes during meetings, during sprints and to the sprint cycle management .	Peer-evaluation			
	A5 - The student has shown autonomy in their work: given a task, they will achieve it (in face of adversity).	Peer-evaluation			
	A6 - The student has shown self-reflexivity : they accept constructive criticism; they knows how to evaluate and communicate on their work / emotional situations.	Peer-evaluation
